Professional Summary

Full-Stack Software Engineer who builds and scales enterprise financial-services web applications, from accessible (WCAG), framework-agnostic front ends in TypeScript to RESTful backends on SQL Server. Led an SSR-to-SPA modernization and drove cross-team adoption of a shared design system, working closely with multiple engineering teams in Agile environments. Daily AI-assisted developer who uses Claude Code to ship faster while keeping quality high through code review.

Technical Skills

Languages: TypeScript, JavaScript, C#, Python, SQL (MySQL, T-SQL), HTML, CSS/SCSS
Frameworks & Tools: Angular, Vue, React, RxJS, .NET, Postman, Git, Jira, Swagger, Storybook, AG Grid
AI & Agentic Tools: Claude Code

Professional Experience

Full-Stack Software Engineer September 2024 – October 2026
SS&C Technologies New York, NY

- Built and shipped full-stack features for the portal, a client-facing fund administration platform unifying 150+ fund applications through Application Request Routing (ARR), delivering fund management workflows, secure document upload and management, and data-driven analytics reporting.
- Re-architected the Angular design system into a framework-agnostic component library, enabling reusable UI components and cross-team adoption regardless of tech stack.
- Designed relational database schemas in SQL Server and built scalable, maintainable code that streamlined the client onboarding workflow.
- Refactored legacy code and backend RESTful APIs to meet client requirements, writing MSTest unit tests,implementing JWT-based authentication with role-based access control (RBAC), and applying secure coding practices, improving maintainability and scalability.
- Led the team's migration from server-side rendering (SSR) to a single-page application (SPA) architecture and the delivery of new user-facing features.
- Integrated Claude into the daily development workflow to accelerate feature delivery, refactoring, debugging, and documentation, reducing time spent writing code and unit tests by approximately 60%, validating all AI-generated code through code review.

Assistant Manager, Software Engineering March 2022 – September 2024
SS&C Technologies New York, NY

- Spearheaded the design and development of an Angular-based design system and reusable component library, establishing a consistent UI/UX across the Fund Services application suite.
- Collaborated cross-functionally with multiple engineering teams to integrate the design system, providing technical guidance and driving adoption and UI consistency.
- Embedded as a loaned developer on partner teams to deliver features and unblock critical deadlines.

Education

The City College of the City University of New York — New York, NY
Bachelor of Science, Computer Science | Graduated December 2020
